Hi

As you can see above this is my original logo; I'm looking for an additional redesign preferably something that will match with this one, but smaller.

I require a preferably black and white small square or round that can be used on many different marketing/business documents, especially one that will fit in my OFFLINE DATABASE – that cannot be larger than 80 x110 pixels in size and needs to be in a bitmap format, so it will fit on my invoice/receipts in this database programme. (see pdf invoice/receipt) To see what I mean.

If possible I would like this new funky logo to be able to have it in various sizes so as small as an app logo up maybe a business card size if possible?

I have attached various formats of my old logo and invoice/receipt examples in pdf so you can see what I mean.

Kind Regards,

Chris Cairns

Changing and updating company or organisation logo

The Main Menu displays a graphic which can be changed to that of your organisation or company logo. The procedure to display your own logo is as follows:-

- 1 Generate your logo using a graphics package. The logo must be 80 by 110 pixels in size.
- 2 Save the graphic in a bitmap format. e.g. Logo Number1.bmp
- 3 Click on the Change Logo button.
- 4 Enter the full path to the graphics file into the input dialogue box
- 5 Click on the O/K button.

Information as to where the new logo graphic file reside will be stored in the database.
